Network as a Service

API exposure platform: driving scalable, secure, and efficient telco transformations

// Unlock the future of telecom with Tallence

As a key contributor to the Camara/TM Forum project, an open-source initiative under the Linux Foundation, Tallence is at the forefront of developing standardized APIs that enable seamless access to telco network capabilities.

Camara/TM Forum's mission is to simplify the complexity of telco networks by providing harmonized APIs, facilitating faster technology development, and ensuring seamless customer experiences across networks and countries.

Network-as-a-Service (NaaS) is key to sustainable growth, enabling telcos to optimize infrastructure, enhance agility, and unlock new revenue opportunities. Discover the latest advancements in telco API integration and explore how these innovations can drive your business forward.

// Key features & benefits

> The API exposure platform enables seamless integration of Camara/TM Forum APIs with mobile network infrastructure, providing API management, user consent handling, and charging integration. It ensures scalability, security, and efficiency, empowering operators to monetize network resources and enhance service delivery.

> The adoption layer bridges the API Exposure Platform with telco infrastructure, enabling seamless integration through flexible protocol support, including REST, SOAP, and proprietary formats. It accelerates deployments with transformation DSL, ensuring scalability, efficiency, and reduced integration complexity.
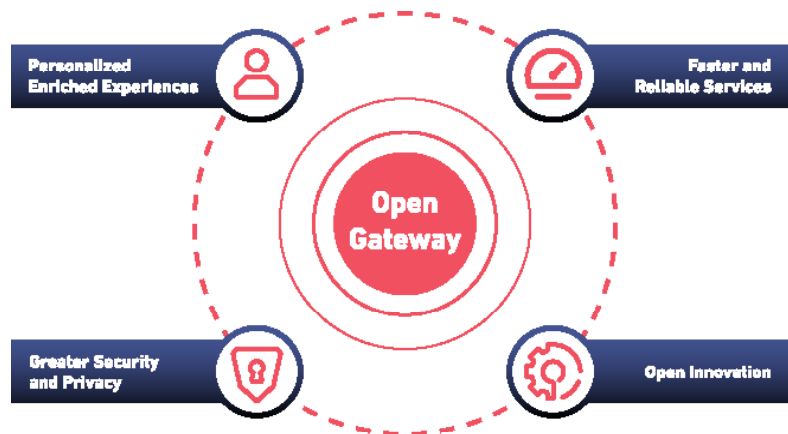

Notable projects

Open Gateway Initiative

Tallence plays a pivotal role in Telefónica Germanys Open Gateway project, an initiative aimed at revolutionizing access to telecommunications services through open interfaces (APIs). This project exemplifies the dynamic nature of the telecommunications market and Tallence's commitment to innovation.

Partnership with MATRIXX Software

Collaborating with MATRIXX Software, a software telecoms company, Tallence supports telco operators in migrating to new converged charging and billing systems, enhancing efficiency and reducing costs.

Personalized Enriched Experiences			Faster and Reliable Services
	Open Gateway		
Greater Security and Privacy			Open Innovation

// How Tallence creates value

Tallence stands out by combining innovative solutions, expert knowledge, and strategic collaboration to deliver impactful results. Here's what defines our approach:

> **Innovative solutions**

Tallence's contributions to the Camara/TM Forum project highlight our ability to revolutionize telco services with cutting-edge technologies and standardized APIs, enabling seamless integration and enhanced functionality.

> **Expert insights**

With extensive expertise in telco operations, we provide the knowledge needed to implement APIs effectively, ensuring seamless network access and operational improvements.

> **Strategic partnerships**

By fostering collaborative partnerships, we help businesses enhance operations through tailored strategies, shared innovation, and sustainable growth opportunities.

// Use the full potential of your networks now!

We look forward to discussing how we can collaborate with you to drive innovation and enable you to use the full potential of your networks.

Let's talk about your needs!
