# Telco Transformation Services

TA//ENCE

Into the TechCo Future with Tallence Transformation Services

The telco industry is evolving at an unprecedented pace. From the rollout of next-generation networks to the increasing demand for seamless digital experiences, telco providers are facing growing challenges and opportunities. At Tallence, we are specialised in guiding telco companies through these transformations, enabling them to thrive in a competitive and fast-moving landscape.

// Telco-to-TechCo transformation journey

// Key features & benefits

Tallence offers a comprehensive suite of transformation services specifically tailored to the Telco-to-TechCo journey. Our services focus on these key areas:

> Strategic consulting

We help telco companies redefine their business strategy to align with digitalisation and customer-centric models. By analysing your current operations and identifying growth opportunities, we lay the foundation for a successful transformation journey towards an AI-Native telco era.

> Business & IT process design and optimisation

Efficient processes are the backbone of any successful telco operation. Tallence helps you streamline workflows, reduce operational costs, and accelerate time-to-market for new products and services.

> Data, IT & network migration

A stepwise evolution to new target architectures requires data, IT and network migration processes to shift telco operations towards the new domains. The Tallence migration framework covers all the key aspects of these transformation projects, from the conceptional design, implementation and integration to the operational management of the migrations.

> OSS / BSS legacy transformation

We assist in decoupling traditional legacy software systems and migrating existing telco OSS/BSS to a modern, standardised and cost-efficient zero-touch architecture incorporating, for example, TM Forum's ODF standards.

> Application development & modernisation

We develop customised applications and modernise legacy solutions with TM Forum's ODA and Open API concepts as a guideline.
By integrating flexible modules, components and robust security measures, we improve efficiency, flexibility and future viability of your systems while simultaneously reducing costs.

> Governance & security

In an era of heightened data privacy concerns, maintaining strong governance and security practices is non-negotiable. Tallence ensures your customer solutions are compliant with regulatory requirements and safeguarded against emerging threats.

// How Tallence delivers success

Our transformation services stand out because of our industry expertise, agile approach, and customer-centric mindset. Here's how we drive results:

> **Industry knowledge**

With years of experience in telecommuni-cations, we bring deep domain expertise to every project.

> **Agile methodologies**

We prioritise collaboration, transparency, and adaptability to ensure fast and flexible delivery.

> **Customer-centric solutions**

Every telco company is different. Our tailo-red strategies ensure that you get solutions that fit your unique business needs.

> **Measurable outcome**

Our focus on KPIs and business impact means we deliver results you can see and measure.

" In today's telco industry, providers are facing a perfect storm of challenges: revenue stagnation from traditional services, disruption by OTT players, and the need to invest heavily in new technologies like 5G and IoT, all while meeting escalating customer expectations for personalised experiences. Tallence is ready to navigate these turbulent waters with you, providing expert guidance and tailored solutions to transform your business.

// Ready to transform your telco business?

The future of telecommunications is being built today. With Tallence Transformation Services, you can unlock new opportunities, enhance operational efficiency, and deliver the experiences your customers expect. Let's shape the future together.

Let's talk about your needs at MWC 2025!
